

Fathers of the Sciences and Great Scientific Minds; In Their Own Words

December 4, 2013 at 2:37am

Public

"He who thinks half-heartedly will not believe in God; but he who really thinks has to believe in God." - Isaac Newton

Contrary to the opinion of far too many these days, science is in no opposition to God our Creator or the Divinely Inspired Biblical Account. In fact science is the result of the inquisitive nature of mankind as he perceives all creation. The fathers of the many fields of science today mostly were just persons who sought to know what is Truth. You will find in their own words that they not only believed in the Biblical Account; but that they believe in the GOD, our Creator of the Biblical Account. As you read these quotes, understand their point and mine; and that is they sought to know more about our Creator by the study of His Creation; as should we all.

I have submitted these quotes from some of the greatest scientists the world has ever known as "scientific evidence" for the existence of our Creator. By that I mean that these very founders of the sciences, in their expert opinions; of which could easily be argued as coming from superior minds; who gave us the scientific laws and foundations for our modern era; after a lifetime of research, made these conclusive statements. THEIR ENTIRE BODY OF RESEARCH is scientific evidence for GOD because THEY in their own conclusions SAY SO! Each of these great minds are telling every one else that if you study their notes, their formulas, their theorems, and creation as diligently as they did; you will find evidence of Intelligent Design everywhere. (the scientific study of creation leads to knowing our Creator). I get people who are obviously brainwashed so thoroughly they can't understand that the findings of these fathers of the sciences themselves are their OWN WORDS herein quoted; scientific evidence. The laws, the formulas, postulated theorems that explain what we observe in Creation show that INTELLIGENCE created it ALL. IF YOU CAN'T UNDERSTAND HOW AN ENTIRE LIFETIME SPENT GATHERING DATA THAT FORMED THE SCIENTIFIC LAWS WE STILL USE TODAY IS SCIENTIFIC EVIDENCE FOR OUR CREATOR; then it is obvious you are no match even for the intelligence of these persons who are all telling you so plainly from the bulk of the lifetime of their own research that very fact; and you may be suffering from lack of reading comprehension, delusions, or other issues that keep you from being able to perceive reality and use logic and reason to understand it. (in other words are suffering from a depraved mind - <http://biblehub.com/romans/1-28.htm>; in which case I hope and pray for Mercy for your soul from above; if you will only take the time to view the <http://www.facebook.com/notes/michael-swenson/evidence-of-god-our-creator/568134419932188> and watch the presentations and read all the links; otherwise you may be on a path of total insanity and depravity. If you continue to reject Truth and the Knowledge of our Creator, it will not go well with your soul now or ever. I hope for your sake that is not the case; as it never went well for hard hearts and hard heads in all of history - <http://biblehub.com/romans/9-18.htm>).

Sir Francis Bacon, known as the father of the scientific method, wrote: **"There are two books laid before us to study, to prevent our falling into error; first, the volume of Scriptures, which reveal the will of God, then the volume of the Creatures [Creation], which express His power."** - <http://www.ucg.org/booklet/bible-true/one-worlds-most-popular-books/their-own-words-great-men-and-women-who-highly-resp/>

<http://www.brainpickings.org/index.php/2013/02/15/galileo-letter-to-duchess-of-tuscany/> - contrary to the title of this blog, **Galileo Galilei** was in no way opposing GOD and he said this plainly in his own words.

"I do not feel obliged to believe that the same God who has endowed us with senses, reason and intellect has intended us to forego their use and by some other means to give us knowledge which we can attain by them. He would not require us to deny sense and reason in physical matters which are set before our eyes and minds by direct experience or necessary demonstrations."

and

"People who are unable to understand perfectly both the Bible and the science far outnumber those who do understand them. The former, glancing superficially through the Bible, would arrogate to themselves the authority to decree upon every question of physics on the strength of some word which they have misunderstood, and which was employed by the sacred authors for some different purpose. And the smaller number of understanding men could not dam up the furious torrent of such people, who would gain the majority of followers simply because it is much more pleasant to gain a reputation for wisdom without effort or study than to consume oneself tirelessly in the most laborious disciplines."

and he goes on to state

"...nor is God any less excellently revealed in Nature's actions than in the sacred statements of the Bible."

he was even familiar with and understood the chief endeavor of the Holy Ghost (the Holy Spirit).

"Now if the Holy Spirit has purposely neglected to teach us propositions of this sort as irrelevant to the highest goal (that is, to our salvation), how can anyone affirm that it is obligatory to take sides on them, that one belief is required by faith, while the other side is erroneous?"

Being filled with the Holy Spirit myself; if present; I would have replied to him, that GOD our Creator has not *neglected* to teach us Truth in any way; but that we will be learning it from Him for all eternity. Our present limited understanding of what is Truth; is not to be laid in any way upon the Master of the Universe; as if our Creator has not made it plain before us; as we adventure in discovery of it; by observing and meditating upon His Creation; including the diligent study of His Word given to us in the Holy Bible. Please do not sir, out of your own present ignorance, falsely accuse our Creator of some supposed negligence on His part; and I say the same to the many who are doing so today.

I will furthermore add, that if you THINK you have found something contrary to the Biblical Account in the study of Creation; then you should examine both what you THINK is contrary and your comprehension of what you read more thoroughly. Galileo did properly understand that most who argue from what is contained therein against fundamental, observable Truth; do so because they have incorrectly interpreted the meaning of what they read; even as he did in presupposing others before him had not observed such things as he had through his optics.
(<http://www.godempowersyou.com/documentation/HistoricalTestimonyandMinistry/MansChronologicalExistenceExplained.pdf>)

For contrary to what Galileo went on to state; (for which I would have rebuked him to his face sternly):

Galileo stated falsely; **"That the intention of the Holy Ghost is to teach us how one goes to heaven, not how heaven goes."**

Our Creator teaches us only Truth about **EVERYTHING!** As it is written:

"and the Comforter, the Holy Spirit, whom the Father will send in my name, he will teach you all things, and remind you of all things that I said to you."
-<http://biblehub.com/john/14-26.htm>

"But whenever The Spirit of The Truth comes, he will lead you into the whole truth, for he will not speak of his own will, but he shall speak whatever he shall hear and he shall reveal the future to you." - <http://biblehub.com/john/16-13.htm>

Our Eternal Creator teaches us the Truth concerning everything! Lack of knowledge is apparent in us all because we are not our Perfect Eternal Creator; but it is most apparent in those who are choosing not to learn from Him directly (by the Presence of His Holy Spirit upon us <http://www.biblegateway.com/passage/?search=Acts+2%3A38-39&version=KJV>; diligent study of His Word http://biblehub.com/2_timothy/2-15.htm, the Holy Bible, and the confirming comparative, accurate observation of His Creation; the sciences <http://biblehub.com/romans/12-2.htm>)!

http://biblehub.com/1_john/2-27.htm and <http://biblehub.com/hebrews/6-18.htm>

It seems some people like to argue just for the sake of arguing. Heliocentric! Geocentric! Heliocentric! Geocentric! etc. but the Truth is that our entire solar system is in constant motion hurling through space like a complex bola. That BOTH the earth is revolving around the sun AND the sun around the earth; which is hurling around our galaxy; which is hurling through space itself in similar fashion.

<http://www.youtube.com/watch?v=RON9rWcALWc>

The entire universe is like a massively complex bola of galaxies (more bolas) of solar systems (more bolas) of planetary systems (more bolas), etc. (matter throughout the universe is moving like this - https://www.youtube.com/watch?feature=player_embedded&v=SbK34NaMnQ4; in constant motion through time and space; which is the Fourth Dimension also known as The Lord's House); all matter that was sent spinning off and away from the origin (the only stationary point in all time and space) and can be found at the intersection of time and space by reverse extrapolation of the expansion of the flung galaxies all flying outward from the origin. (<http://www.youtube.com/watch?v=ri3R6vFvEg> and <http://www.youtube.com/watch?v=uxUAC9ya3o> and <http://www.facebook.com/photo.php?fbid=451991028213195&set=a.115635768515391.22520.100002069048072&type=3&theater>) our Creator set the entire universe in motion and in a way that galaxies are revolving around the origin while revolving around each other as they expand outward in the void of space. In the galaxies, solar systems are doing the very same thing; including ours. These solar systems are in motion in such a way as while they are revolving around their respective galactic centers, they have smaller/larger solar systems all around them do the very same thing. The best analogy I could think of at present is the flung bola; while the sun is larger than the earth both are still in fact moving through space and revolving around each other as they do. The path through space is not such a smooth line as is often depicted in diagrams but has the same kind of wobbles to it that flung bolas do (to a greater or lesser extent). <https://www.facebook.com/notes/michael-swenson/so-you-think-the-big-bang-is-scientific/620654451346851> So actually the paths are not like the 3d models in grade school at all but more like bolas and if you were to follow the paths would look like spiral waves as these particles of dust and fire of various sizes expand explosively from the origin of the universe (the same way light is observed to travel -<http://www.howstuffworks.com/light6.htm> - because when we look into time and space (all that we perceive of visible creation) we are actually viewing those spiral waves of light trails; not the moving objects themselves). SOME visible elements are spinning in seeming opposite directions from the vast majority BECAUSE OF EXPLOSIONS AND COLLISIONS WITH OTHER SPINNING BITS OF MATTER in space that we call galaxies today. Likewise SOME particles don't appear in the many clusters of galaxies because of EXPLOSIONS OF SUPERHEATED matter we call stars, novas, etc. SOME of those particulates then cool and even ice and we call those objects things like dark matter, planets, asteroids, comets, etc. BUT GENERALLY in 360 degrees from the origin in great orbital (wobbling) planes around the origin galaxies are spinning and revolving at various velocities (DUE TO THE AMOUNT OF MATTER THAT BROKE OFF FROM THE ORIGIN WHEN THE UNIVERSE WAS ALL GATHERED TOGETHER IN ONE SUPER HEATED ENORMOUS MASS AND IF IN THE PROCESS IT BROKE AWAY SLOWLY (LOW VISCOSITY GALAXY) OR QUICKLY (HIGH VISCOSITY GALAXY) OR EVEN EXPLODED FROM THE ORIGIN. To this day stars can and do explode (YES, BURNING LIQUIDS, GASES AND SOLIDS CAN DO THAT) and even galactic centers (JUST LARGER MASSES THAN THE STARS OF SOLAR SYSTEMS REVOLVING AROUND THEM) can do the same.

My point here is that most of us are like little children (even Galileo) that when we explore the universe in which we find ourselves and discover anything at all about it are likely to boast of it to others and in such a way as to become very defensive about our "new discovery" (<http://biblehub.com/ecclesiastes/1-9.htm>); so defensive we can fall into the same heresy we accuse others of practicing (that of ignorance; made worse by the mixture of arrogance in far too many). And in that boast make errors like thinking GOD doesn't mean what He states in His Word; when in fact it is appropriate that in some regards it talks of the heavens from a geocentric perspective; because that is where we live in flesh and blood and how we look out and perceive the celestial bodies. There is therefore no error in that perspective and no contradiction, scientifically speaking or in any other rational connotation, throughout the Holy Bible. If one takes a larger rock of more mass and ties it to a smaller and throws it in bola fashion both rocks still act upon one another to a greater and lesser extent; our solar system, while having more objects than just the two, operates in similar fashion; it is therefore neither heliocentric or geocentric, technically speaking. It only serves to discuss it as predominantly heliocentric; since that is the largest nearby mass affecting all the smaller rocks it acts upon; but never forget those smaller rocks we call planets are also acting upon it; together with nearby solar systems in our galaxy; along with all the other seen and unseen forces that exist by the Words and Power of our Creator <http://biblehub.com/colossians/1-17.htm>.

"As a man who has devoted his whole life to the most clear headed science, to the study of matter, I can tell you as a result of my research about atoms this much: There is no matter as such. All matter originates and exists only by virtue of a force which brings the particle of an atom to vibration and holds this most minute solar system of the atom together. We must assume behind this force the existence of a conscious and intelligent mind. This mind is the matrix of all matter." - - Max Planck (founder of the quantum theory and one of the most important physicists of the twentieth century)

<http://www.simpletoremember.com/articles/a/science-quotes/>

The mass of our sun (and all stars) is burning off; if it loses its mass at a rate that it's gravitational force equals the centripetal force of those objects flying around it and whose velocities are slowing down, then harmony is maintained; but in the more likely event either velocities of planets change to upset that balance (most likely by collisions or near collisions) or the mass of the star(sun) explodes or burns off; the earth could find itself either flung off into space or pulled into the sun's burning flames. It is; after all, only a lake of fire. <http://biblehub.com/revelation/20-14.htm> (I am NOT saying the sun is THE lake of fire); I am only saying it is A lake of fire (one of many billions of them) to make my point in how many people mock the Divinely Inspired Holy Scriptures while in the presence of such clear examples that such things as "lakes of fire" exist all around them; throughout the entire universe, and one very prominently viewed and experienced by all who dwell on earth day after day!

Albert Einstein

"In view of such harmony in the cosmos which I, with my limited human mind, am able to recognize, there are yet people who say there is no God. But what really makes me angry is that they quote me for the support of such views." -<http://www.einsteinandreligion.com/atheism.html>

While what we may have of Einstein's quotes may not categorically place him easily in any labeled worldview; it is obvious He believed in a Creator; after giving thought to what he observed in creation. (and I hope for his sake he determined who that "Spirit" is; before he breathed his last) <http://www.clockbackward.com/2009/02/08/was-albert-einstein-religious/>

"I want to know God's thoughts; the rest is just details." -<http://jick.net/~jess/p200/quotes.html>

Too many today are treating science and scientists as if they are infallible and speak almost with reverence about science and scientists. Most do so seem not to understand that scientists (and science thereby) are fallible; even Einstein:<http://www.facebook.com/notes/michael-swenson/emc2-is-rubbish/485479484864349> Too many championing science act as if they don't realize that even words and their definitions can change due to subjective opinions of people (including scientists) concerning them; let alone "scientific laws" or "scientific theories"http://en.wikipedia.org/wiki/Superseded_scientific_theories And obviously, those revering fallible men (science and scientists) above the Divinely Inspired Record of God our Creator in the Holy Bible; don't realize that science and scientific discoveries are STILL trying to catch up with the knowledge in it! (knowledge that existed centuries or millenniums BEFORE scientists finally figure out the Truth of its contents): <http://www.ucg.org/booklet/bible-true/bible-and-science/> It took the advent of supercomputers to find that there are prophetic encrypted messages within the Holy Bible placed there while it accurately recorded history and truth about creation simultaneously!https://www.google.com/search?q=the+bible+code+michael+drosnin&rtz=1C1GIGM_enUS535US535&oq=the+bible+code&aqs=chrome..69i57j0l5.8780j0j8&sourceid=chrome&espv=210&es_sm=93&ie=UTF-8 Very specific prophecies even with dates included in numerous instances!

Back to my point, science and scientists who accurately study creation will only find it leads to the Creator; no matter what field of science one may specialize in. Science will only continually prove the validity of the contents of the Holy Bible as it is still acquiring the knowledge it contains so plainly in the Divinely Inspired words therein: <http://www.facebook.com/notes/michael-swenson/no-more-brainwashing-no-more-lies-science-proves-who-god-is-part-1/518695411542756> and <http://www.facebook.com/notes/michael-swenson/no-more-brainwashing-no-more-lies-science-proves-who-god-is-part-2/518696871542610> and <http://www.facebook.com/notes/michael-swenson/prophecies-show-divine-inspiration-of-the-holy-bible/520171808061783> And all these fathers of the sciences understood that.

http://en.wikipedia.org/wiki/List_of_Christian_thinkers_in_science

"The gift of mental power comes from God, Divine Being, and if we concentrate our minds on that truth, we become in tune with this great power. My Mother had taught me to seek all truth in the Bible."

— Nikola Tesla

<https://www.goodreads.com/quotes/817967-the-gift-of-mental-power-comes-from-god-divine-being>

Max Planck -

"Both religion and science need for their activities the belief in God, and moreover God stands for the former in the beginning, and for the latter at the end of the whole thinking. For the former, God represents the basis, for the latter – the crown of any reasoning concerning the world-view." - <http://withalliamgod.wordpress.com/2010/11/28/max-planck-on-god/>

Carl Sagan

"Science is not only compatible with spirituality; it is a profound source of spirituality. When we recognize our place in an immensity of light-years and in the passage of ages, when we grasp the intricacy, beauty, and subtlety of life, then that soaring feeling, that sense of elation and humility combined, is surely spiritual...The notion that science and spirituality are somehow mutually exclusive does a disservice to both." - <http://www.youtube.com/watch?v=Ag6fH8cU-MU> As a scientist you would think he could answer such simple questions he expressed in that video: <http://www.facebook.com/notes/michael-swenson/acknowledging-the-eternal-creator-takes-no-faith-it-is-scientific-fact/491948024217495> and <http://www.facebook.com/notes/michael-swenson/creation-v-evolution-please-use-your-intelligence-to-recognize-intelligence/566154943463469>

Francis Collins

"Science is...a powerful way, indeed - to study the natural world. Science is not particularly effective...in making commentary about the supernatural world. Both worlds, for me, are quite real and quite important. They are investigated in different ways. They coexist. They illuminate each other."

--American physician-geneticist and director of the National Human Genome Research Institute

- http://www.goodreads.com/author/quotes/20100.Francis_S_Collins

William H. Bragg

"From religion comes a man's purpose; from science, his power to achieve it. Sometimes people ask if religion and science are not opposed to one another. They are: in the sense that the thumb and fingers of my hands are opposed to one another. It is an opposition by means of which anything can be grasped."

--British physicist, chemist, and mathematician. Awarded Nobel Prize in 1915

- <http://www.beliefnet.com/Faiths/Galleries/God-and-Science-What-Do-Scientists-Believe.aspx?p=9>

And I agree that the way to grasp the Truth contained in writing within the Holy Bible comes from seeking answers from our Creator and by observing Creation in a rational manner; scientifically. Even our Creator told us that any claims that scientific findings were in anyway contradictory to His Divine Instructions for Life contained in the Holy Bible were false; as true science (factual observations of creation) will always confirm what our Creator has declared and made known to us. No one who long observes and meditates upon what he or she perceives can fail to see the Intelligence that made all things and holds all things together to this very moment. http://biblehub.com/1_timothy/6-20.htm

Fred Hoyle

"A junkyard contains all the bits and pieces of a Boeing 747, dismembered and in disarray. A whirlwind happens to blow through the yard. What is the chance that after its passage a fully assembled 747, ready to fly, will be found standing there? So small as to be negligible, even if a tornado were to blow through enough junkyards to fill the whole Universe."

"Life cannot have had a random beginning ... The trouble is that there are about 2000 enzymes, and the chance of obtaining them all in a random trial is only one part in 10^{40,000}, an outrageously small probability that could not be faced even if the whole universe consisted of organic soup."

"The notion that not only the biopolymer but the operating program of a living cell could be arrived at by chance in a primordial organic soup here on the Earth is evidently nonsense of a high order."

"Once we see, however, that the probability of life originating at random is so utterly miniscule as to make it absurd, it becomes sensible to think that the favorable properties of physics on which life depends are in every respect deliberate It is therefore almost inevitable that our own measure of intelligence must reflect ... higher intelligences ... even to the limit of God ... such a theory is so obvious that one wonders why it is not widely accepted as being self-evident. The reasons are psychological rather than scientific."

B. Prokop said...

Add Fred Hoyle. British cosmologist; came up with the term "The Big Bang".

Fierce and vocal atheist for decades. Embraced theism late in life, after being convinced that Intelligent Design was the only rational belief.

(Also a great writer. Might I recommend "The Black Cloud".) -<http://dangerousidea.blogspot.com/2011/03/list-of-former-atheists.html> --English mathematician and astronomer.

- http://www.goodreads.com/author/quotes/199992.Fred_Hoyle

I'm also a former atheist (the brainwashing in our American public schools is that effective; so effective I forgot about early childhood recurring nightly dreams from our Creator for many years): -
<http://www.godempowersyou.com/documentation/HistoricalTestimonyandMinistry/888WeOvercameByTheBLOODoftheLAMBHowICametoKNOWGODWordofmyTestimony.pdf>

Johannes Kepler

1571-1630 German Astronomer

(planetary orbits, optics, mathematical language of science) The 3 laws of planetary motion. Advanced Copernicus' heliocentric theory.

"Since we astronomers are priests of the highest God in regard to the book of nature, it befits us to be thoughtful, not of the glory of our minds, but rather, above all else, of the glory of God."

"...the harmony in the universe is "a sacred sermon, a veritable hymn to God the Creator"...."

"Oh God, I am thinking thy thoughts after Thee" Johannes Kepler

"I believe only and alone in the service of Jesus Christ. In him is all refuge and solace."

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

Isaac Newton

English mathematician & physicist, one of the greatest scientists of all time. Laws of gravitation and motion, developed calculus. Major contributions to optics, physics, math and astronomy.

“He who thinks half-heartedly will not believe in God; but he who really thinks has to believe in God.”

The solar system itself could not have been produced by blind chance or fortuitous causes but only by a cause "very well skilled in mechanics and geometry."

"There are more sure marks of authenticity in the Bible than in any profane history."

"No sciences are better attested to than the science of the Bible." "This most beautiful system of the sun, planets, and comets, could only proceed from the counsel and dominion of an intelligent and powerful Being.... This Being governs all things, not as the soul of the world, but as Lord over all; and on account of his dominion he is wont to be called Lord God." Isaac Newton; Principles.

"It must be expressed in the very form of sound words in which it was delivered by the apostles. For men are apt to run into partings about deductions. All the old heresies lie in deductions. The true faith was in the Biblical texts."

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

“This most beautiful system of the sun, planets and comets, could only proceed from the counsel and dominion of an intelligent and powerful Being.”

<http://www.simpletoremember.com/articles/a/science-quotes/>

<http://www.answersingenesis.org/articles/cm/v12/n3/sir-isaac-newton>

James Clerk Maxwell

Scottish Physicist

discovered the relationships between electricity, magnetism and light and introduced the concept of field of EM force, devout Christian

"Happy is the man who can recognize in the work of today a connected portion of the work of life, and an embodiment of the work of Eternity."

"Think what God has determined to do to all those who submit themselves to his righteousness and are willing to receive his gift [of eternal life in Jesus Christ]. They are to be conformed to the image of his Son and when that is fulfilled and God sees they are conformed to the image of Christ, there can be no more condemnation."

"I think that men of science as well as other men need to learn from Christ, and I think that Christians whose minds are scientific are bound to study science that this view of the glory of God may be as extensive as their being is capable of."

"The more we enter into Christ's work He will have more room to work His work in us. For He always desires us to be one with us. Our worship is social, and Christ will be where two or three are gathered together in His name."

http://www.adherents.com/people/pm/James_Clerk_Maxwell.html

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

Michael Faraday

Discovered benzene and electromagnetic radiation, invented the generator and was the main architect of classical field theory. One of the prominent experimental scientists of all time.

"Speculations, man, I have none. I have certainties. I thank God that I don't rest my dying head upon speculations for "I know whom I have believed and am persuaded that he is able to keep that which I've committed unto him against that day."

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

<http://www.icr.org/article/3958/>

<http://www.answersingenesis.org/articles/cm/v12/n4/faraday>

Robert Boyle

Developed the idea of atoms. Boyle's law.

Wrote: *The Wisdom of God Manifested in the Works of Creation*. Governor of the Corporation for the Spread of the Gospel of Jesus Christ in New England.

"From a knowledge of God's work we shall know Him."

<http://www.goodreads.com/quotes/144147-from-a-knowledge-of-god-s-work-we-shall-know-him>

Arthur Compton

Nobel Prize-winning physicist for his discovery and explanation of the change in the wavelength of X rays when they collide with electrons. Compton effect confirmed the dual nature of electromagnetic radiation as both a wave and a particle.

"From earliest childhood I have learned to see in Jesus the supreme example of one who loves his neighbors and expresses that love in actions that count, who knows that people can find their souls by losing themselves in something of great value, who will die rather than deny the truth in favor of the popular view held by his most respected contemporaries. That Jesus lives so vitally in men today makes me hope that by following in his footsteps in my small way I also may live forever."

"For myself, faith begins with the realization that a supreme intelligence brought the universe into being and created man. It is not difficult for me to have this faith, for it is incontrovertible that where there is a plan there is intelligence. An orderly, unfolding universe testifies to the truth of the most majestic statement ever uttered: 'In the beginning God'"

"In their essence there can be no conflict between science and religion. Science is a reliable method of finding truth. Religion is the search for a satisfying basis for life."

"What nobler ambition can one have than to cooperate with his Maker in bringing about a better world in which we can live? Science has created a world in which Christianity is a necessity."

"I believe that its insistence on the inherent value of individual men and women Christianity has the key to survival and the good life in the modern world."

<http://www.doesgodexist.org/JulAug08/Nobel-Compton.html>

J.J. Thompson

Discovered the electron

"In the distance tower still higher [scientific] peaks which will yield to those who ascend them still wider prospects and deepen the feeling whose truth is emphasized by every advance in science, that great are the works of the Lord." (Statement in *Nature*)

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

Charles Coulson

Architect of molecular orbital theory.

"There were some ten of us and together we sought for God and together we found Him. I learned for the first time in my life that God was my friend. God became real to me, utterly real. I knew Him and could talk with Him as I never imagined it before and these prayers were the most glorious moment of the day. Life had a purpose and that purpose coloured everything."

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

Robert Griffith, a member of our U.S. Academy of Sciences, Otto Stern professor of physics at Carnegie Mellon University received one of the most coveted awards of the American Physical Society in 1984 on his work in physical mechanics and thermodynamics. Physics Today said he is an evangelical Christian who is an amateur theologian and who helps teach a course on Christianity and science.

He recently said:

"If we need an atheist for a debate, I'd go to the philosophy department—the physics department isn't much use."

At Berkeley University, among 55 chemistry professors, we only had one who was willing to openly identify himself as an atheist, my good friend Bob, with whom I still have many discussions about spiritual things.

<http://bib.irr.org/scientists-and-their-gods>

Charles H. Townes

Nobel Prize winner. Inventor of the maser and laser. First to observe an interstellar molecule

"You may well ask, "Where does God come into this," to me, that's almost a pointless question. If you believe in God at all, there is no particular "where"—He is always there, everywhere....To me, God is personal yet omnipresent. A great source of strength, He has made an enormous difference to me." From *Making Waves*.

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

"For successful science of the type we know, we must have faith that the universe is governed by reliable laws and, further, that these laws can be discovered by human inquiry. The logic of human inquiry is trustworthy only if nature is itself logical.... This is the faith of reason"

<http://benevolentbaptist.wordpress.com/2013/02/02/faith-within-reason-charles-h-townes-on-faith-in-scientific-thought/>

Allan Sandage

One of the world's greatest observational cosmologists. Estimated the age of the universe.

"The world is too complicated in all its parts and interconnections to be due to chance...I am convinced that the existence of life with all its order and each of its organisms is simply too well put together."

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

"I find it quite improbable that such order came out of chaos. There has to be some organizing principle. God to me is a mystery but is the explanation for the miracle of existence, why there is something instead of nothing."

- Alan Sandage (winner of the Crawford prize in astronomy) Willford, J.N. March 12, 1991. Sizing up the Cosmos: An Astronomers Quest. New York Times, p. B9.

<http://www.simpletoremember.com/articles/a/science-quotes/>

Ilya Prigogine (Chemist-Physicist) Recipient of two Nobel Prizes in chemistry

"The statistical probability that organic structures and the most precisely harmonized reactions that typify living organisms would be generated by accident, is zero."

I. Prigogine, N. Gregoir, A. Babbyabtz, *Physics Today* 25, pp. 23-28

<http://www.simpletoremember.com/articles/a/science-quotes/>

Christian de Duve

"A Guided Tour of the Living Cell" (Nobel laureate and organic chemist)

"If you equate the probability of the birth of a bacteria cell to chance assembly of its atoms, eternity will not suffice to produce one... Faced with the enormous sum of lucky draws behind the success of the evolutionary game, one may legitimately wonder to what extent this success is actually written into the fabric of the universe."

<http://www.simpletoremember.com/articles/a/science-quotes/>

"[Probably the leading paleontologist alive today, Simon Conway Morris, the scientist who discovered the significance of the Cambrian explosion of animal life, writes in his seminal book, *Life's Solutions*, that he is "convinced" that nature's success in the lottery of life has "metaphysical implications."]"

<http://www.simpletoremember.com/articles/a/science-quotes/>

Dr. Michael Denton (Australian microbiologist)

"...The capacity of DNA to store information vastly exceeds that of any other known system: it is so efficient that all the information needed to specify an organism as complex as man weighs less than a few thousand millionths of a gram. The information necessary to specify the design of all the species of organisms which have ever existed on the planet...could be held in a teaspoon and there would still be room left for all the information in every book ever written..."

<http://www.simpletoremember.com/articles/a/science-quotes/>

John O'Keefe (astronomer at NASA)

"We are, by astronomical standards, a pampered, cosseted, cherished group of creatures.. .. If the Universe had not been made with the most exacting precision we could never have come into existence. It is my view that these circumstances indicate the universe was created for man to live in."

- Heeren, F. 1995. *Show Me God*. Wheeling, IL, Searchlight Publications, p. 200

<http://www.simpletoremember.com/articles/a/science-quotes/>

Anthony Flew

Professor of Philosophy, former atheist, author, and debater

"It is, for example, impossible for evolution to account for the fact that one single cell can carry more data than all the volumes of the Encyclopedia Britannica put together."

"It now seems to me that the findings of more than fifty years of DNA research have provided materials for a new and enormously powerful argument to design."

<http://www.simpletoremember.com/articles/a/science-quotes/>

George Greenstein

"As we survey all the evidence, the thought insistently arises that some supernatural agency—or, rather, Agency—must be involved. Is it possible that suddenly, without intending to, we have stumbled upon scientific proof of the existence of a Supreme Being? Was it God who stepped in and so providentially crafted the cosmos for our benefit?"

(American astronomer) *Greenstein, George. The Symbiotic, Universe: Life and Mind in the Cosmos. (New York: William Morrow, (1988), pp. 26-27*

<http://www.simpletoremember.com/articles/a/science-quotes/>

Frank Tipler

"When I began my career as a cosmologist some twenty years ago, I was a convinced atheist. I never in my wildest dreams imagined that one day I would be writing a book purporting to show that the central claims of Judeo-Christian theology are in fact true, that these claims are straightforward deductions of the laws of physics as we now understand them. I have been forced into these conclusions by the inexorable logic of my own special branch of physics."

(Professor of Mathematical Physics) Tipler, F.J. 1994. *The Physics Of Immortality*. New York, Doubleday, Preface.

<http://www.simpletoremember.com/articles/a/science-quotes/>

Ben Carson (one of the world's top neurosurgeons)

"God has given us more than fourteen billion cells and connections in our brain. Why would God give us such a complex organ system unless he expects us to use it?"

http://www.goodreads.com/author/quotes/11100.Ben_Carson

William Phillips

Nobel prize for the development of methods to cool and trap atoms with laser light.

"God has given us an incredibly fascinating world to live in and explore."

Arthur Schawlow

Nobel Prize winner in Physics. Development of the laser and laser spectroscopy

"We are fortunate to have the Bible, and especially the New Testament, which tells so much about God in widely accessible, human terms."

Alexander Polyakov

Russian Physicist

"We know that nature is described by the best of all possible mathematics because God created it." The famous Russian physicist, Alexander Polyakov Fortune magazine (October, 1986),

Sir William Herschel

"All human discoveries seem to be made only for the purpose of confirming more and more the Truths contained in the Sacred Scriptures."

Sir William Herschel (1738-1822), English astronomer, he made numerous discoveries about the laws of the heavens.

C.F. Gauss One of the greatest mathematicians of all time. Contributed significantly to pure mathematic and made practical applications of importance for 20th-century astronomy, geodesy, and electromagnetism.

"There are problems to whose solution I would attach an infinitely greater importance than to those of mathematics, for example touching ethics, or our relation to God, or concerning our destiny and our future; but their solution lies wholly beyond us and completely outside the province of science."

John Wheeler

Princeton University astronomer

"Slight variations in physical laws such as gravity or electromagnetism would make life impossible . . . the necessity to produce life lies at the center of the universe's whole machinery and design," stated John Wheeler, Princeton University professor of physics (*Reader's Digest*, Sept., 1986).

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm>

Lord Kelvin

1824-1907 (William Thomson) British physicist; helped lay the foundations of thermodynamics. First and second laws of thermodynamics. Absolute temp scale. Trans-Atlantic cable.

"I believe that the more thoroughly science is studied, the further does it take us from anything comparable to atheism."

Do not be afraid to be free thinkers. If you think strongly enough, you will be forced by science to the belief in God.

<http://www.valleypresbyterian.org/curriculum/science/quotes.htm> and <http://www.valleypresbyterian.org/curriculum/science/science.htm>

Blaise Pascal, *Pensées*

"There is a God shaped vacuum in the heart of every man which cannot be filled by any created thing, but only by God, the Creator, made known through Jesus." - http://www.goodreads.com/author/quotes/10994.Blaise_Pascal

About 80% of the listed 100 most influential persons in history acknowledge the Creator as the God of the Holy Bible; most of the other 20% in this list were influential but in a detrimental way toward humanity and creation. http://www.adherents.com/adh_influ.html

It is evident that the greatest minds and most powerful persons in the history of the world have been deeply religious; purpose driven people. (even atheism is religious in nature in that they choose to believe in a concept that they can in no way prove and choose to believe in it; **even though science and rational thought proves their faith in the absence of an Intelligent, Eternal Creator; to be false -**

<http://www.facebook.com/notes/michael-swenson/no-more-brainwashing-no-more-lies-science-proves-who-god-is-part-1/518695411542756>) But my point in this brief note on these scientific greats is that even the fields of science we have today would not even exist apart from those who wanted to know more about our Creator by the careful and meticulous observation of creation! That many today who so revere science and wrongly think it as adversarial to Truth and our Creator; don't even realize the science they believe in CAME FROM THE KNOWLEDGE of persons who KNEW AND OPENLY ACKNOWLEDGED OUR CREATOR! That SCIENCE itself COMES FROM OUR CREATOR; as well as the great minds who have recognized that fact in all of history.

The many fields of science ultimately owe their origins and continued existence to our Eternal, Intelligent Creator and to persons who; even though persecuted in varying degrees and some even murdered in the cause; still chose to Glorify GOD our Creator by the use of reason, rational thought, and meticulous observation of creation with lifelong meditation on the same! All who would be wise and knowledgeable do the same.

<http://coldcasechristianity.com/2013/the-rich-historic-roll-call-of-great-christian-thinkers-and-scientists/>

This list is by no means exhaustive and is only the tip of the iceberg of all those who deserve to be recognized for their great achievements. If you are a scientist and by studying creation have discovered our Creator, I encourage you to write, publish, speak out about it; and try and monitor textbooks for our now faulty public indoctrination system; because we can save lives and souls from great suffering, great anguish; if we will only teach the children (and everyone) the Truth!
